OFFICE & WORKS.

C. & P. R. R.**NEAR WOODLAND AVENUE,****CLEVELAND, * * OHIO.**

All Hames offered by this Company are made from Second Growth Timber and the best American Iron. The Workmanship is first-class. The construction is SUPERIOR to that of all other Hames. A pin is made solid on a loop and fits into the holes in the back of the Hame, so that when the strap is put through the loop, the pin holds the loop firmly in its place. But when the strap is unloosed, the pin may be withdrawn, and the Hame easily adjusted to any length of collar. A much **Neater Connection** is thus made than when the Strap passes around the Hame as in the old style. *The Strap lies flat upon the top of the Collar,* instead of standing EDGEWISE or twisting down.

INTRODUCTORY.

In presenting this, our Fifth Annual City Directory of Cleveland, we take the opportunity of expressing our gratification at the success that has thus far attended our efforts to give the public a trustworthy and comprehensive guide to the city, embracing everything necessary to render such a work complete. Taught by the experience of five years in the intricate work of compiling city directories, and aided by experienced and careful assistants in the labor of canvassing and compiling, we have been so far enabled to avoid defects and errors. We present our directory for 1875-76 with a feeling of confidence that it will meet the needs and elicit the favorable commendations of our patrons.

We make no claim that our work is perfect or that it is free from errors, but simply that it is as near perfection as the careful and earnest work of competent men can make it. The canvass for a city directory is beset by numerous unavoidable difficulties. Many persons whose judgment should teach them the folly of such a course, give information reluctantly and inaccurately, others refuse information entirely, and we are forced to seek it from outside sources; others again esteem it humorous to impose on canvassers by giving fictitious names and in other ways interfering with the correctness of so important a work. The gleaning out of these defects is a laborious task that can hardly be accomplished perfectly, and this is one of many difficulties that interfere with the absolute perfection of a city directory. That we have accomplished this in an eminent degree we believe, and hence our confidence that our work will meet a favorable reception.

Thanking our patrons for their liberal encouragement and trusting that our present issue will, in their estimation, justify all that we hope for,

We are, respectfully,

FROM THE SCIENCE OF HEALTH.

OPEN FIRES.—In every home there should be at least one open grate, or some other arrangement for burning wood, or hard or soft coal. A fire which can be seen as well as felt—a cheerful, bright, blazing fire, with shovel and tongs—and fender, too, if you please—which will attract the family by its social influences, is a grand thing in a home. Those black, grim, tartarean flues, filled with the stale odors of cellar and hot air-chamber and seething water-tank, and emitting clouds of pulverized ashes to cover your furniture and stifle your lungs, are among the greatest banes of family enjoyment and comfort. It is all well enough to have one's dwelling warmed from top to bottom, and to have no coals to carry beyond the furnace, but this heating system has done immense mischief to the family powers, scattering the members of it all over the house, and furnishing not one attractive spot in which the inmates will gather, as by instinct they do, to enjoy the cheery comfort of the fireside. There is no fireside in most of our modern houses. There are only holes in the floor or in the walls. And we are disposed to think that the good ventilation of the open fire adds not a little to the unconscious blessings of its hospitable and domestic influence. The sight of the little folks, as they sit amusing and amused while the wood fire burns, and watching the fantastic flames and the glowing coals, is worth many times the cost of that cord of hickory or oak at city prices; and a wise household would rather part with the furnace which that bright blaze supplements and atones for, than with the low grate which makes the family circle a real thing. Try it, ye who can, and see if the moral, æsthetic, and domestic power of this style of home comfort is over-estimated.—*The Science of Health.*

STREET AND AVENUE GUIDE.

EXPLANATION.

On referring to this Directory, it will be noticed that the names of streets, avenues, etc., follow each other in strictly alphabetical order, without regard to location. To all the *more important* streets and avenues are subjoined the names and numbers of intersecting streets, avenues, etc., in the order in which they occur, so that if you wish to find, say No. 827 St. Clair, by reference to the Guide you will find that St. Clair crosses Case av. at No. 820 and Lyman at No. 840, hence, the place you seek is between these two numbers, and nearest to Case av. Where no numbers are designated, the corner is vacant or occupied by a church or school house. In locating the small, obscure or most distant streets, pains have been taken to give the line of street cars by which they can be most easily reached.

PIANOS!

GEO. HALL'S

GREAT WESTERN

PIANO DEPOT!

22 PUBLIC SQUARE, CLEVELAND, O.

GREAT REDUCTION IN PRICES FOR THE YEAR 1875.

Having this year adopted the plan of principally selling direct to our customers from our general depot at Cleveland, we are enabled to greatly reduce our prices in future, and we are now supplying the public with Pianos and Organs on monthly payments, or otherwise, at much lower rates than ever offered in this city or elsewhere in the west.

FACILITIES.

Probably no dealer in Pianos and Organs in the great west is now in possession of equal advantages with ourselves, for buying our goods low and on such terms as enable us to be particularly accommodating and easy with our customers, and we propose to give them in the future the full benefit of our long experience, by furnishing them good inducements at low prices, thereby saving the risk of buying on uncertainties.

BUSINESS MEN.

In this city or elsewhere, are particularly invited to call and see us before purchasing. Churches, and benevolent institutions generally, furnished without a profit, and occasional donations of instruments to such societies as appear to be destitute of means to purchase will be cheerfully made.

TUNING & REPAIRING.

Having long made a specialty of this branch of the trade, our ability to repair, tune and polish instruments is fully equal to those of the best factories of the east; having men in our employ of twenty years experience.

It is well known to the public that our business has always been conducted upon a strictly uniform and fair basis, and we propose always to be ready to select instruments for our customers and guarantee them entire satisfaction. Old Pianos, &c. always taken in exchange for new.

GEO. HALL.
